2024 SUMMER CAMPS CODING & ROBOTICS

CODING and ROBOTICS

CODING WITH FUN & ROBO-FUN CAMP

Instructor: Stemtree

This camp uses robots to inspire campers to learn engineering, apply their basic science, model construction, computer programming, and problem solving skills and knowledge to explore STEM concepts. This program utilizes instructional time, assessments, and hands on activities to reinforce key concepts and improve problem solving skills while having fun. Coding With Fun teaches students the concepts of computer programming in a fun and interactive way while developing their basic reasoning and problem-solving skills. We teach students how to create and develop computer programs (games, stories, etc.) instead of playing them. They will combine multimedia elements to create and share their own interactive stories, animations, games, music, and art.

BUILD YOUR OWN CIRCUIT & CODE WITH FUN CAMP

Instructor: Stemtree

This Stemtree camp offers two main programs: Stemtree's Build Your Own Circuit brings together a wide range of concepts, from electricity to electronics. Children are fascinated by lights and sounds, but little do they know about the circuits and electronics behind them. We make learning easy for children with practical hands-on activities and experiments. Not only are these activities fun, safe, and easy, they will introduce children to the engineering field and inspire them to become tomorrow's problem solvers. Stemtree's Coding Program teaches students computer programming concepts in a fun and interactive way while developing their basic reasoning and problem-solving skills. We teach students how to create and develop computer programs (games, stories, etc.) instead of playing them.

Instructor: Stemtree

This Stemtree camp offers two main programs: Robo-Fun and Science Fun. Robo-Fun uses robots to inspire campers to learn engineering and apply their basic science, model construction, computer programming, and problem-solving skills and knowledge to explore STEM concepts.

Stemtree science program keeps students engaged by learning the fundamental concepts behind scientific theories and apply them through hands-on and fun activities. Each student will take an initial assessment on the first day of the program to gauge their level and create a customized learning program. They work through individualized lessons with the one-on-one guidance of an instructor and conduct hands-on activities. Our goal is to make science fun for your child!
