

Vienna Pavement Design Guide

Original 2015-01-15

Final Pavement Sections in the Town of Vienna for new roads shall be built in accordance with the latest VDOT Pavement Design Guide and Fairfax County Public Facilities Manual using field run CBR values. Pavement sections for preliminary purposes only can be established using a CBR value of ten (10). Final pavement design using field run CBR values shall be submitted to Vienna Department of Public Works for review and approval.

Pavement sections provided in this guide are for existing road rebuild only and are bases on the VDOT Pavement Design Guide using the Vaswani method. Roads not specified on this list shall have its pavement design evaluated prior to any new construction. Under drains shall be provided for all roads with greater than or equal to 1000 VPD if CTA is not used for the subbase.

Pavement Section - A 14,000 – 10,001 VPD

Surface (SM-9.5A) - 1.5"
Inter (IM-19.0) – 3.0"
Base (BM-25.0) – 4.0"
Subbase (21-A) – 10.0"
Under drains

Or

Surface (SM-9.5A) - 1.5"
Inter (IM-19.0) – 2.0"
Base (BM-25.0) – 4.0"
Subbase (CTA) – 6.0"
