312 CIVILIAN POSITIONS

The warrant is entered into the computer in the warrant module. If a case already exists, the PD 7 becomes a supplement to the report. The supplement is entered as an update to the original report. The warrant is entered into the computer warrant module. The warrant number will always be the same number as the case number. When a warrant is recalled it is logged out as a recall in the same manner as a served warrant with the appropriate notations on the PD7, and the computer's incident module and warrant module. In cases where there is no officer who is responsible for the warrant (i.e. capiases, citizen warrants, etc.) the Dispatcher will make VCIN entries without an officer's request. This information will then be forwarded to the Communications and Records Coordinator.
- C. The Communications and Records Coordinator shall enter the information in the computerized warrant file for each document received.
- D. Information is entered as detailed on the warrant, information from the officer, and valid information received from any other resources (i.e., DMV files CCH files or previous department records). Any information from the Clerk of Court on a withdrawal should be
